Yeah, the anomaly was that there was net erosion that year and it didn't play into their story of MNR.

I seem to recall they thought something about 2002 was "anomalous" and they didn't like it and went with 2003 forward.

Why are they comparing 2003 to 2009? The RI compares 2002 to 2009 and there are a lot of bathy studies conducted between 2002 and 2003.
